

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. Please amend claims 13 and 19 as follows:

Listing of Claims

1-12. (Canceled)

13. (Currently Amended) A recording/reproducing apparatus capable of simultaneously (a) recording video or audio into a recording medium and (b) reproducing the video or audio from the recording medium, comprising:

recording means for recording video or audio signals and identifying signals, indicating non-user generated content of the video or audio signals, into a recording medium;

list generating means for generating a title list of only not yet reproduced videos or audios recorded in the recording medium ~~and not yet reproduced~~ using said identifying signals to arrange the title list; and

reproducing means for reproducing one or more videos or audios in the title list,

wherein the reproducing means automatically sequentially reproduces part of each not yet reproduced video or audio in the title list upon user selection of an introduction playback mode.

14. (Previously Presented) The recording/reproducing apparatus according to claim 17,

wherein the sorting means sorts the video or audio titles in order of date, title, classification or recording in response to a received user indication.

15. (Previously Presented) The recording/reproducing apparatus according to claim 17,

wherein the sorting means sorts the titles of the recorded video or audio that has been automatically recorded by a timer in the recording/reproducing apparatus that have not been reproduced, in the order of recording.

16. (Previously Presented) The recording/reproducing apparatus according to claim 13, wherein the reproducing means sequentially reproduces, for a predetermined amount of time, a beginning part of videos or audios in the title list upon user selection of the introduction playback mode.

17. (Previously Presented) The recording/reproducing apparatus according to claim 13, further comprising:

receiving means for receiving a user indication of sorting the video or audio titles;

sorting means for sorting the titles in the title list in response to a received user indication; and

providing means for providing the sorted title list to the user.

18. (Previously Presented) The recording/reproducing apparatus according to claim 17, wherein the providing means provides thumbnail images corresponding to the sorted titles.

19. (Currently Amended) A recording/reproducing method for simultaneously (a) recording video or audio into a recording medium and (b) reproducing the video or audio from the recording medium, comprising:

recording video or audio signals and identifying signals, indicating non-user generated content of the video or audio signals, into a recording medium;

generating a title list of only not yet reproduced videos and audios recorded in the recording medium ~~and not yet reproduced~~ using said identifying signals to arrange the title list; and

reproducing one or more videos or audios in the title list,

wherein upon user selection of an introduction playback mode, automatically sequentially reproducing part of each not yet reproduced video or audio in the title list.

20. (Previously Presented) The recording/reproducing method according to claim 23,

wherein the sorting step sorts the video or audio titles in order of date, title, classification or recording in response to a received user indication.

21. (Previously Presented) The recording/reproducing method according to claim 23,

wherein the sorting step sorts the titles of the recorded video or audio that has been automatically recorded by a timer that have not been reproduced, in the order of recording.

22. (Previously Presented) The recording/reproducing method according to claim 19, wherein the reproducing step sequentially reproduces, for a predetermined amount of time, a beginning part of videos or audios in the title list upon user selection of the introduction playback mode.

23. (Previously Presented) The recording/reproducing method according to claim 22, further comprising:

receiving a user indication of sorting the video and audio titles;
sorting the titles in the title list in response to a received user indication; and
providing the sorted title list to the user.

24. (Previously Presented) The recording/reproducing method according to claim 23, wherein the providing step provides thumbnail images corresponding to the sorted titles.
